

WATER SPRAY GUN • WORLD "2100"

Technical Features:

The World "2100" Water Spray Gun incorporates a trigger lock relieving operator strain for continuous spraying.
It is equipped with a trigger guard which protects the hand and prevents accidental bumping.
A live inlet swivel avoids the hose from twisting.
An effective spray control valve provides desired flow pattern.
A heavy duty on-off valve allows quick actuation.
A dual valve control permits a smooth starting flow without a kick-back effect.
The diffuser nozzle provides turbo-spray action and protection of the tip.

Applications:

General spray washing and cleaning operations.

Material:

Plastic hand grips & trigger guard • Stainless steel pipe
Brass body and head • Ceramic front jet

Maximum Pressure:

1160 PSI.

Range • Coverage Area:

45 ft. + • 6350 sq. ft. +

Notes:

Spray pattern selection from hard straight stream to smooth fog-spray.
Follow the Original Equipment Manufacturer' specifications, installation instructions, operational safety precautions and storage and maintenance procedures.
